

# ☞ Tokodai Forum for Visiting Researchers☞

## - Current Japan and Tokodai, 2011 -

The Great East Japan Earthquake that hit Japan on March 11<sup>th</sup>, followed by a series of nuclear incidents, not only devastated the country but also shook the whole world. As Tokodai is an institution of higher education that specializes in science and technology, we would like to offer our scientific analysis and insights on the current situation based on our expertise through a two-part lecture series. We will also introduce the Tokodai profile in this forum.

Lectures will be given in English and are also open to international students.

### Program

Date: May 25, 2011, Wednesday

Place: Tokyo Tech Front (TTF) "*Tokodai Kuramae Kaikan*" in Japanese

Facilitator: Dr. Tom Hope, Associate Professor and International Office Advisor
